Professional Summary

Passionate web developer with a degree in and hands-on experience in developing dynamic web applications. Proficient in HTML, CSS, and JavaScript, with additional skills in responsive design frameworks like Bootstrap. Completed a capstone project involving e-commerce site development, demonstrating the ability to handle real-world web development challenges. I am eager to contribute my creativity and technical skills to a team that works collaboratively.

Education

**Electrical And Electronics Engineering,
T.J.S.Polytechnic College Pudhuvoyal, Pudhuvoyal**

03/2018 - 05/2021

**Bachelor of Technology Electrical And Electronics Engineering,
Dr. M.G.R. Educational And Research Institute, Maduravoyal**

08/2021 - 04/2024

Projects:

Perfumy Shopping Website:

"Exquisite Scents" is a sleek and user-friendly online perfume shopping website meticulously crafted using the foundational web technologies of HTML for structure, CSS for styling, and the responsive framework of Bootstrap for a seamless experience across all devices. This project aims to provide a sophisticated platform for users to discover and purchase a curated collection of exquisite fragrances.

BLood Mangement System:

This project outlines the development of a robust and efficient Blood Management System (BMS) designed to streamline the critical processes involved in blood donation, storage, distribution, and transfusion. Utilizing MySQL as its relational database management system, the BMS aims to enhance the efficiency, safety, and transparency of blood-related operations for blood banks, hospitals, and related healthcare facilities.

Simple Memory Game:

This project details the development of a fun and engaging Rock Paper Scissors game implemented entirely using JavaScript, HTML, and CSS. The game allows a user to play against the computer, with the computer making random selections for each round. The application provides an interactive user interface where players can make their choice, see the computer's selection, and view the outcome of each round, along with a running score.

Step-up-style E-commerce:

"StepUpStyle" is a basic yet functional online fashion store frontend built using HTML for structure, CSS for styling, and React JS with simple JavaScript functions for dynamic content and user interaction. This project aims to showcase a basic product catalog, a simple cart functionality, and a clean user interface for browsing and selecting fashion items Product Listing,Product Card,Simple Cart,Add to Cart" Functionality,Remove from Cart.
